

# Tanvesh Sarve

[sarvetanvesh01@gmail.com](mailto:sarvetanvesh01@gmail.com)

## Skills

I love working with Rust and Typescript and everything else around them

## Interests

Performance, Complex Animations, Full accessibility

Mechanical keyboards.

Mountaineering, Endurance sports.

I dabble in photography and video on the side, and you can catch some of my cool stuff over at: [tanny.jpeg](#)

Fullstack Engineer + occasional designer

[Website](#) [GitHub](#) [Twitter](#)

## Experience

Follow Alice - Fullstack Engineer Oct 2022 - Present

- Building new features for the main website and maintaining it. Features like **Airbnb inspired Self booking of Trips and checkout flow.**
- **Worked on the CI to improve running times on Gitlab.**
- Built multiple Slack and Discord Bots to support different internal teams

Dukaan - Frontend Engineer March 2022 - Sep 2022

- Working on the seller side app's features and Implementing, maintaining and improving our software platforms.
- **Replaced babel with esbuild** in our client side setup that **improved our build times by 80%** and **optimized docker setup to cache and improve build times in our dev servers.**
- **Built multiple eslint plugins for internal projects to ensure consistency over our projects.**

wrky.ai - Frontend Engineer Sep 2021 - March 2022

- Built the whole web app from scratch with **next.js and TypeScript**. Used **GraphQL codegen with react-query** to have type sharing between frontend and backend. **Implemented pre-fetching in server-side**, eliminating loading states on the first load.
- Built a **Component Library with a Design System** in place with Stitches. That Helped with building new pages for the app in no time.

wrky.ai - Frontend Engineer Intern Oct 2020 - Sep 2021

- Built a Web app from scratch that is being used by thousands of folks to take assessments and HRs to manage Candidates and create assessments.
- Rewrote almost 60% of the codebase in **TypeScript**
- **Integrated react-query and eliminated all loading states** except the first load, by caching server data and fetching in the background.

## Projects

### [Shundo](#)

Shundo is a **productivity powerhouse** tailored for Windows users, offering features like a lightning-fast **File Search**, a user-friendly **Natural Language Calculator** for quick conversions, and easy access to recent **VsCode projects** directly from the keyboard. It's built on top **Tauri**, **windows-rs** and **Rust**.

### [motion-hooks](#)

A React Hooks wrapper over Motion One, An animation library, built on the Web Animations API for the **smallest filesize** and the **fastest performance**. It has more than **7.4K downloads** on npm and was featured on [reactjsexamples](#).

### [online-ide](#)

An **online ide for the compilation of C++17, Java, and Python** with an code editor that supports syntax highlighting. Built the editor with codemirror. Using JDoodle's Compiler API to compile user's code. Built with React, Express, and Node.
